Liquidation Sale

OPPORTUNITY KNOCKS — *Now*

Yes Now!

While these famous varieties are available at greatly reduced prices, you should not miss the opportunity to buy in large quantities and save. Now is your opportunity to stock up on new varieties that are being publicized in all the garden magazines.

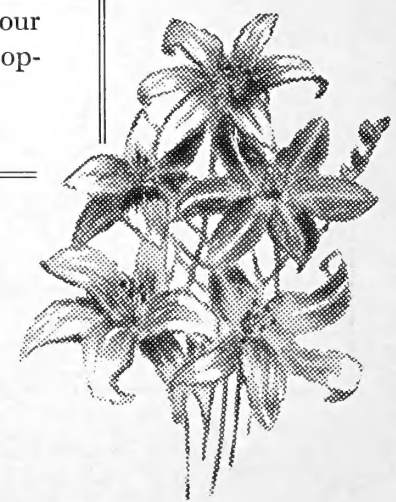

Fine Iris and Daylilies

NURSERYMEN, LANDSCAPERS, DEALERS

New hybrid Iris and Daylilies create a sensation when in bloom, and sales for first year on new varieties should more than clear the cost of your stock several times. The California Highway Department has surveyed a freeway across our fields. We must sell a million plants and vacate this property before work is started. You can stock up now. Our loss is your gain.

MILLIKEN GARDENS

P. O. Box 1131
POMONA, CALIFORNIA

MILLIKEN GARDENS famous for fine Iris and Hemoracallis for over 30 years.

Mr. Carl S. Milliken, originator of many fine iris and daylilies, has been awarded the highest honor medal for outstanding achievement for the breeding of superior new varieties—many of which have won awards of merit. Be sure to include these Milliken triumphs in your order this year. Your garden will be the better for it.

1956 DAYLILY INTRODUCTIONS

BLACK ABSOLUTE (Milliken) 30" D. Early midseason. Reblooms. A new dark beauty that will be tops in its class. Four-inch flowers with wide petals that completely overlap the broad sepals are a dark chocolate brown that is washed with red-black. A black eye encircles a small orange throat. Rather low growing and vigorous. Moderate of increase. **\$30.00.**

CREPETTE (Milliken) 36" Ev. Midseason and reblooms. An unusual flower, bright in color, and with a sear-sucker crepeing throughout the petals and sepals, which are very broad and overlap and wide open. The crepeing gives an additional sparkle to the vivid golden orange color that is highlighted by a brushing of true red in the throat. The flower is 5" across and is carried on erect well branched scapes. The plant is vigorous and fast of increase. **\$15.00.**

QUARTET (Milliken) 24" Ev. Midseason and reblooms. Here is a novelty that is quite different. Most of the blooms will consist of four petals and four sepals, all very ruffled and the petals overlap at the base even in the normal flowers. This gives a very full flower that is quite effective and unique. The color is apricot overlaid with deep rose. Four inch flowers are carried on low-growing, well-branched stems. **\$10.00.**

VENEZUELA (Milliken) 40" Ev. Early midseason and reblooms. As exciting as the West itself, this Daylily adds a new color to the range of this popular flower. It is a smooth blending of burnt orange and brown that glows in the sunlight and does not fade. The color deepens in the throat and surrounds a small orange cup. Six inch flowers are composed of broad ruffled petals and wide sepals that open flat. The scape is branched and erect. Vigorous growth and fast increase. **\$20.00.**

SPECIAL:

One each: Venezuela, Crepette, Quartet

\$45.00 Value for \$35.00

NOTICE: It is important to read the following before planning your order.

Iris and Daylilies shipped June 15th through October Spruia and Louisiana Iris shipped August 15th through October. State shipping date preferred.

MINIMUM ORDER \$10.00 ON SALE PRICES

All orders will be shipped Express Collect unless postage is included. If less than 20 plants send \$1.00 for packing and postage to save excessive express charges on small quantity. If over 20 plants and you wish parcel post shipment add 5c per plant. On dwarf or miniatures add only 3c per plant.

Orders requiring different shipping dates must be written separately and minimum postage applied to each.

TERMS: Cash with order. Remit by check, express or postal money order.

Shipments open to customers who have previously established their credit with us.

California residents whose orders are being shipped to California points, please add California Sales Tax of 4 per cent or furnish resale number on order.

Prices quoted are for freshly dug, healthy, field grown plants, labeled true to name. Guaranteed healthy and satisfactory upon arrival. No adjustment will be made later than 30 days after date of arrival.

California grown rhizomes are superior. Any iris that is hardy anywhere is just as hardy when grown and shipped from California, but our growing conditions are superior. **You will receive better stock.** Temperatures here drop to the low 20's in the winter, and the extremely hot summers condition our plants for most every climate.

NOTE: Daylily plants can be held in damp sawdust, peat, or sphagnum for months until sold. When planted in cans they bloom profusely and sell readily.

ORDER SHEET—Continued

[illegible]

World famous bearded Iris

HOW TO GROW IRIS

There is no secret in growing iris—the following simple suggestions will insure success, and you will be more than repaid when the next iris-time comes around: Select a sunny, well drained location. Do not plant too deeply—the rhizomes should be just below the surface of the ground. Be sure the roots are firmed in the ground securely. Keep well watered until the plants are established. Fertilize lightly at least twice a year with a good commercial fertilizer, or well-decomposed manure, but be sure this does not come in direct contact with the rhizome—it is the roots which need the food. Divide and transplant iris every three years to insure maintaining good size flowers and abundant bloom.

Memorandum —

ONCOBREDS

These iris are the result of crossing the oncocyclus (natives of Iran), with some of our own bearded iris. The rare beauty of the oncocyclus has been preserved to a marked degree, and increased vigor and hardiness have been secured from these crossings. All of them will grow well in mild climates, and many have proven absolutely hardy in cold sections. They require good drainage, full sun, and a light protective covering in cold climates. They grow better with little water in the summer. Shipped same time as bearded iris.

MINIATURE BEARDED IRIS

These small rhizomes can be planted in low edgings, rock gardens, window boxes, or pots. Unlike other iris, they start blooming with the first inkling of spring warmth (first of March here). Planted in same manner as bearded iris and shipped at same time.

All prices are for top quality, husky, plants.

Memorandum —

SPURIA IRIS

FOR CUT FLOWERS AND GARDEN BEAUTY

The Spurias, sometimes called "Butterfly Iris," resemble the Dutch irises which are extensively used by florists, but the flowers are larger, and numerous blossoms are borne on the three- to four-foot stalks, making a very showy display in the garden, and are superb as cut flowers. They are not as fragile as bearded iris and keep for days.

Spurias require very little care, and can be left in a permanent location, so should be given room in which to grow. They thrive in full sun, or partial shade, and do best if kept well watered in the early spring and throughout the blooming season. We recommend planting in the fall, but it is possible to ship early in the spring. **KEEP VERY MOIST UNTIL ESTABLISHED.** Perfectly hardy, they are worthwhile additions to any garden. Spurias bloom at the same time as the late flowering bearded iris. Shipments made August 15th through October.

LOUISIANA IRIS

The color range of this enchanting group of iris is large, ranging from the purest white through pale pinks to rose, coral tones, soft yellows, rust and copper, blues of every shade, rich old reds, to the blackest purples and wine colors. The shape and size of the flowers vary with the variety, those of the famous Abbeville type are flat and resemble a Japanese iris, while others are crisp and starched looking. Louisiana iris are as easy to grow as bearded iris, although they prefer semi-shade, a soil enriched with plenty of humus and can take a lot of manure—in fact we have planted them using half soil and half manure, and the results have been wonderful. They are heavy feeders. Keep well watered prior to, and during the blooming season. Shipment made August 15th through October.

SIBERIAN IRIS

Tall beardless irises with grass-like foliage, whose dainty flowers are carried on slender graceful stems and are excellent for cutting. The plants like moisture and will do well in partial shade. Best left undisturbed as they are most effective in clumps. Shipment is made August 15th through October.

CAESAR'S BROTHER (Morgan) 3½ ft.

A very dark pansy-purple which is most popular with our visitors. Blooms late.

MORNING MAGIC (Cleveland)

Tall soft lavender suffused with rose. Early flowering.

TYCOON (Cleveland) 3 ft.

Lovely large blue-violet blossoms. Excellent for flower arrangements.

Regular price on above three varieties: 75c; 3 for \$1.00; 10 for \$2.50; 100 for 17.50.

STYLOSA IRIS—Biscra

A beardless iris, winter blooming. It will do well outdoors in warmer sections, in protected areas in cooler sections, and in pots in cold sections. Blooms from November through until spring. Low, grassy, blue-green foliage in which rises rather large, violet and fragrant blossoms. Regular price 75c; 3 for \$1.00; 10 for \$2.50; 100 for \$17.50.

DAYLILIES - (Hemerocallis)

Daylilies are one of the most satisfactory perennials and grow well in almost any location. They are lovely in the border, and are particularly well adapted to naturalizing, as they do well in half-shade. Ordinary garden soil, enriched with humus and manure will produce an abundance of bloom. Varieties can be selected to stretch the blooming season from spring to early autumn. Plant the crowns one inch below the surface, with roots spread slightly downward and water in well. Hemerocallis can be left undisturbed for many years. Time of Shipment: June 15th through October.

NURSEYMEN — LANDSCAPERS — DEALERS

New hybrid Iris and Daylilies create a sensation when in bloom, and sales for first year on new varieties should more than clear the cost of your stock several times. The California Highway Department has surveyed a freeway across our fields. We must sell a million plants and vacate this property before work is started. You can stock up now. Our loss is your gain.
